**DETAILED ACTION**

***Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 10, drawn to magnetic recording medium, classified in class 428, subclass 836+.
  - II. Claims 13 - 20, drawn to a method of making a magnetic recording medium using annealing, classified in class 427, subclass 599.
  - III. Linking claims 11 and 12, drawn to a nominal method of making and linking Groups I and II. These claims will be examined with the elected Group (from Groups I and II).
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as without annealing.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1773

4. No telephone call was made to applicants due to the complexity of the restriction requirement.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
